they were without foundation.
The returns, so far as received up to a late bour last tight, show the vote in the city to be light. The Democratic majority on the State ticket will be about 19,000. From the country districts the returns are not sufficient to form anything like a correct estimate as to the result. The chances are in favor of the success of the Republican ticket, though by a considerably reduced majority.

The vote is closer than it has been for many

As usual, the returns from the County are straggling and confused, and little that is satisfactory can be made out of them. Our dispatches from different places are given in a condensed form. The list of successful candidates which we give will prove, we think, very nearly cor-

Physical Education.

EDUCATION of the mind is the corner stone of all civilization, and cannot be too highly valued, but just in proportion as the mind is educated, does it become necessary to educate the body. In a savage state the body is healthy, because it rarely, if ever, lacks that degree of exercise necessary to maintain the constant and free circulation of the blood, and to promote the various operations of nature. And as the mind, by the process of education, becomes active, the exercise of the body is rendered more and more a necessity. The body must then be exercised not only to keep itself in health, but also to feed and sustain the mind. A healthy mind cannot be said to exist except it has the foundation of a healthy body to rest upon.

It is fact which, if not self-evident, is vouched for by the experience and observation of all men of science, that to insure pure blood and a vigor ous constitution there must be plenty of pure air and moderate exercise, and without this vigorous constitution close study is literally close poison. And yet how rarely, in the haste to bring out the mental powers, is heed given to such things. The youth who enters upon a course of study with a full determination to prosecute them with all the diligence he can master, is liable, unless guarded by more experienced hands, to neglect the physical development, and thus, unconsciously sow the seeds of disease and death. Educate the mind: fill it with all noble thoughts and refined sympathics; but at the same time do not forget that it has sympathies with bodily action and exercise, and without these it will wither and decay.

Even men who bave attained to years of discretion not unfrequently lose sight of what is necessary to health. The merchant, and man of business generally, feels that he has no time to spare for healthful invigorating exercise. He confines himself to the office or counting house day after day, and year after year, in the accumulation of wealth, though often admonished by weakened frames or attacks of dizziness, that nature, nearly exhausted, has claims that cannot with impunity be disregarded. Blindly he disregards these cautions until, perhaps, some sudden "mysterious dispensation of Provi dence" cuts short a career full of hope and pro-

Physical Education, as the concomitant of mutual application, is requisite for persons of all eges. None are too old, and none too young to observe it. That its fullest advantages may be the vast sums of money that are sumually squandered in this city upon illegitimate purposes were applied to the fitting up in connection with each ward school, of the means for gymnastic exercise, a vast addi ional interest would be im parted to our already popular school system, an a corresponding improvement in both physics and mental development of the children would soon manifest itself. The Board of Education consideration.

A French writer has made objection to the prac'ice of gymnastics, and assigned for reason that the strenger a man becomes the more h inclination to rebel against authority. Th same writer says that gymnasts were at the head of the French revolution, and had the audscity to question the divine right of kings and avow the divine right of the people. Such reasoning may do for the Government of Louis Narco LEON, but in this country, where the divineright of the people is paragrount, the people are right of the people is paramount, the people are not afraid of any system of training that will improve as well their physical as their menta condition.

The Plymouth Architectural Prizes. THE exhibition of the plans for the new Plymouth Church, Brooklyn, drew a consider able attendance of Architects and Builders, the church parlors, yesterday, notwithstanding the slight notice given of it and the great cour ter attraction of election day. The attendage will, no doubt, be greatly increased to-day and to-morrow, and to-morrow evening. The hour are from 9 to 4 in the day time, and to-morros evening-which is the only evening exhibition -from 7 to 9) o'clock.

The unusual interest excited by this ne The unusual interest excited by this new church enterprise is due to the great size of the edifice to be erected. A church which will furnish pew sittings for 6,000 persons, giving at an opportunity to see and hear, is something which the world has not yet witnessed. Fee things are more deceptive to the eye than the namber of persons composing any assemblage It has been supposed that the Opera House is this city, would say to the original or openess. things are more deceptive number of persons composing any assemble that the half of the Coper Institute would accommodate 4.000 or 5.000, but the actual fact is that neither room will hold over 3.000 persons, if so many. These matters are rarely understood and appreciated, save by architects and builders—man practically connected with the construction of buildings.

That, however, was to be expected and probably the Trustoes are prepared for it. The Sun may, perhaps, add its quota at a future time.

We omitted yesterday to mention in our list of the plans submitted, those which were presented after the award was made. They were—one from Mr. Albertt Nast, of Milweutie, Wisconsin, and one—a sketch plan on a scale of twenty feet to the inch—from Mr. Jas. G. Austin, of 38th st.

Movements of Plus IX. A correspondent of the Post, writing from Bone, Oct. 11th, says of the Pope:
That august personage is still enjoying the levely air and scenery of the Alban bils, and on Sunday last diversized his acquaements with entertaining at dinner Cardinals Patricit, Caulano, Barnetist, Assume Cardinals Patricit, Cardinals Patricit,

bessedor, the Merquis Lourenass, several keman princes and prelates, and the usual dignitaries of the Papel court.

After dinner he gave audience to several ladies of rank having villas in the neighborhood, and witness ed the freworks got up for the occasion, from his balcony. On Tuesday, accompanied by his surte, he visited the recently restored Cathedral of Albano, and sesisted at the benediction of the Holy Sarrament, and on the following day set out for Frascati, where," says the official journal, 'the was received with the most enthusiastic acclamations of the people," and in all due form by a numerous body of Caddinia. His Holliness afterwards walked some time in the pardens of the Villa Taverna, belonging to the Bonoumas afmily, who, together with other personages of distinction, were in walding present with his family, and it is remarked that the following to receive him. The Franch ambassador was also prosents with his family, and it is remarked that the Holiness's ellegotatura may be productive of beneficial results to the well are of the State, as well as to his personal health. A deputation of gentlems from Clifts Veschis had an audience of his Holmess two days ago, for the purpose of soliciting the honor of a tief to their town, in case, as was auticipated, the Pope should undertake a maritime excursion from Ports of Annzie in the new steam corvette recently constructed in England to his Hollness's order. Incidents of the Day.

The election, throughout the city, yesterday, passed off in an unusually quiet manner. The liquor shops, in the neighborhood of the polling places, were mostly closed, and broken heads and battered faces were not as plentiful as they have been known to be at previous elections in this city. The polling

places in some of the wards were not opened at sunrise, as the law requires, and there was, consequent ly, some dissatisfaction expressed by those who were compelled to waste time whi e waiting the movements of the inspectors. In the first district of the 18th ward, the pells were not opened until nearly an hour after sunrise, on account of the absence of one of the inspectors. All sorts of electioneering disages were reserted to by the friends of the various parties. and great efforts were made to convince indifferen persons that the welfare of the city or State depended on the success of this or that candidate. Consid erable delay was occasioned in many cases by clerical errors in the registry lists. The affidavits which non-registered voters were compelled to make necessarily occupied much time. All sorts of excuses were made to account for a failure to have the name registered. Some said it was "inconvenient" for them to get registered; others that they believed the l.w a humbug. The excuses were obliged to be

taken, the law not requiring anything more than a reason, satisfactory or not. The Pelice Commissioners were ready to go into session at any moment for the purpose of calling out the military, on the slightest indications of a serious row, but, happily, they were not sequired to perform this duty. Several regiments were ordered to collect at their armotics, to be ready to assist the special po-licemen, who, under the command of Captain Wal-LING and Sergeant Chorts, patiently waited with four large omnibuses, drawn by four horses each, at their disposal, to go soywhere where their services were never. You few arrests furthers voting were made, the illegal voters not seeming to care enough about the matter to risk getting into the Peniten-

In the Fourth Ward, Wx F. Jones was arrested, ged with illegal voting. In the arrest was made, but the party was afterwards discharged. In the 7th Ward, Taos. MAHAN WAS AT ested, and Justice STERES looked him up for examination. In the 16th Ward, 5th poll district, the polis were held in a groggery, contrary to law.

At Tammany Hall an immense crowd was asset bled, and at near eight o'clock a meeting was called to order by Capt. RYNDERS, who nominated Mr. D. B. Tayloz Chairman. The nomination was accepted amidst enthusiastic cheering, and Mr. TAYLOR took his seat after a few congratulatory remarks. Capt. RYNDERS next spoke at some length of the prospects of the party, the honor of a constancy to the timebonored principles of the Democratic party, etc., after which Mr. Jas. NESBITT delivered a few eloquent remarks in the same strain. The returns, as far as received, from the city, were then read, each announcement of the triumph of the Democracy being halled with loud and continued applause. At length Mr. T. CARBOLL proposed from the stage, three cheers for FERNANDO WOOD. The choers were given heartily, but a difficulty ensued between Mesers McCunn and Nassir, who were about proceeding to violent measures, when Mr. Cansont interfered to effect a settlement. Instead of doirg so, he managed to incur the wrath of some one in the crowd, who shied a fluid lamp at his head, striking his cheek and arm. The disturbance was promptly quelled, and the meeting soon after adjourned. The meeting lasted but about an hour, and soon after its adjourn ment the crowds separated to the various newspaper

Bushels of Grain Destroyed.

Buffalo, Nov. 8.—The grain elevator in this city, of the New York Central railroad, was totally destroyed by fire at 11 o'clock last night.

It contained over 200.000 bushels of grain, all of which was destroyed. The loss on the building and machin ry is about \$50.000, which is uninsured.

The loss on the grain is over 200.000, but is fully insured. The extensive freignt depot of the sompany adjoining was alightly damaged. The origin of the fire is unknown.

adjoining was slightly damaged. The origin of the fire is unknown.

Private dispatches state that the building is only partially destroyed. It is known as the Buffalo City Elevator, and is located nearly opposite the Central depot on Buffalo creek. The report is that there is an insurance of about \$2 0.00 to the property destroyed, but we can thus 'ar trace only a small amount to the effices in this city.

We learn of the following policies in this city:

Montank Ins. Co. \$5 000

Thomas C. Green, Esq., one of the counsel for Cook, said, that as counsel, he had not yet had time to read the indictment, and had not yet decided what plea to enter to the charge. He was mable to proceed in the case, and would profer that the Commonwealth abould proceed with the case of Symphese, which would allow them time to prepare for the case of Cook.

A. D. STEPHER'S was accordingly brought into Court and placed upon a mattrass. He looks pale and haggard. his abstinence from food and the large quantities of modicine taken by him having had a decided offect. He bears up under his wounds with much fortitude, and is seldom heard to murmur. His cransal, Mr. SERSHOTT, (who had endeavored to have his trial moved to an adjoining county, but was refused,) appeared, and the empannelling of the jury was proceeded with. After a considerable number of jurymen had been obtained, Mr. Hunter access and said that he had just received a despatch which would probably interfere with the further proceedings in empannelling a jury. He then read the following telegraphic despatch from Gow. Wisz:

Richmond, Nov. T.—Andrew Hunter, Dear Sir: I think you had better try Cook, and hand Stermans over to the Federal authorities. Respectfully,

Mr. Hunter stated that he had, for several days,

I think you had better try Cook, and mand Strains over to the Federal authorities. Respectfully,

Mr. Huwren stated that he had, for several days, been in correspondence with Gov. Wise, and had in his possession a number of facts important to the development of this case, which were unknown to the public, and which would, for the present, renain so. He had, since his last letter to the Governor, come into possession of other facts which pointed to Sterums as the most available party to be handed over to the federal authorities, as he felt assured that enough would be ascertained to result in bringing before the Federal bar a number of the prominent abolition fanatics in the Rorth.

Mr. Handrid objected to these proceedings and insated that the case should be proceeded with. He was not in league with Gov. Wiss or any one cles, and was not feed by any one. He would only receive as a compensation for his ardious labors the small pit ance received by the Circuit Court.

Mr. Six-sorv remarked that he had not consuited with his ciient, and as the jury had partly been chosen, he would not consent that the State should read over the prisoner to the Government. For what purpose it was to be done was known to Governor Wisz, and had been foreshadowed by the remarks of Mr. Huwras. If time had been allowed him, the trouble had in empannelling the jury would have been dispensed with.

Mr. Hismarrium remarked that he would proceed immediately with the case of Stratuses. and hand

troble lad in empanishing the jury would have been dispensed with.

Mr. Hempartum remarked that he would proceed immediately with the case of Statuers, and hand the pisoner Hazart, who has not yet been indicted, to the Federal Court. It was immaterial to him whe ther Strettens would prefer a trial or not.

Mr. Skenort then asked a delay of a moment for consultation with Statuers, after which he announced that the prisoner accepted the offer of the State to hand him over to the Federal authority, and would therefore prefer to be remanded back to jail.

Mr. Harding desired the Cerk to eater his carnest protest against the whole proceedings. He considered the proceedings wrong, and wished it to be shown on the decket.

Judge Parkers to the Clerk—"Do no such thing: I

Judge Parker to the Clerk—"Do no such thing; I wish no such protest entered on the docket of this Court."

wish no such protest entered on the docket of this Court."

The prisoner was then handed over to U. S. Marshal Martie, and lodged in jail, where he will remain until the term of the Federal Court at Staunton, which will not meet for some time.

The jury was then ducharged, and a large number of freeholders of the Court summoned to appear to morrow morning, at nine o'dlock, when the case of Cook will be taken up. It will excite a large degree of interest. Cook will be defended by J. E. Macnonald, Attorney, of Indiana, and Mesers. Lawson, Botts, and Tomas C. Geers, of our own bar. The presention will be consucted by Anderse Hunter, Eq. The prisoner seems to be in fine spirits, and is not without hope of a verdict in his favor.—Governor William and Mr. Crowley, his brotherin-law, will be present during the entire trial.

Tuesday Morning—Cook's trial commenced this morning. The opening speech was made by Mr. Harding. Cook's confession was read in open court by Andrew Hunter. A jury was then empanneled.

Fire in Atlanta - Fatal Powder Explosion. Atlanta, Ga., Nov. 8.—A fire broke out last night in the store of J. A. Girson, Commission Merchant, of this place. From Washington

Washington, Nor. 8.—As the chief, if not the only difficulty, in the way of the consummation of the pending treaty between the United States and Mexico, is in relation to the proposed transit routes, several influential parties have submitted to both Governments a basis of compromise. It is, that whichever Government may have forces nearest any scenes of obstruction or disturbance, and! promptly interfere for that purpose—each with the privilege of entering the territory of its neighbor,—and that both, in case of emergency, should act unitedly. Toe assistance recently afforded by the Mexican troops from Matmorae, to the peops of Revenwelle, is stated as an example. Such a proposition, however, to be incorporated in the treaty, must come from the Liberal Government. This, it is understood, is favorably regarded by our own.

There is no doubt that both the governments of Great Britain and the United States are decidedly in accessed a presenting their respective positions or ecuvictions of right, in relation to the San Juan quistion, atthough not more so than they were in the Oregon question. But the latest foreign official advices do not justify any apprehension of serious deficulties between the two countries.

One or two horses are thought to have perished in the flamee.

THE SCHILLER CENTENARY .- The Gorman population of the United States, and of Germany, tolay commence a fostival—to last in New York for three days to celebrate the centennial anniversar of their distinguished countryman, Schuller, the poet, dramatiet, and historian. Great preparations have been made, from Maine to California, and throughout Europe, to celebrate the anniversary in an appropriate manner. The Germans in this city have not been behind in making arrangements for the celebration, and will offer, with their coun trymen in other portions of the country, the homage due the memory of a man who, by his birth, belonged to them, but by his works may fairly be claimed by humanity throughout the world.

The great poet was born in a small town called Marbach, in the kingdom of Wurtemburg, and died in Weimar at the age of forty-'our years. Like many other men of genius, he failed to be fully appreciated by his cotemporaries, and did not receive, during his life time, due credit for the services he rendered to his country and mankind. He scorned to descend to servile flattery of kings and princes, an his recompense was, therefore, small. He was followed to the grave by a few mourning friends, but his countrymen soon learned to cherish his memory in their hearts. His fame soon spread to other lands, and on the coming analyersary, hundreds of thousands in almost every portion of the civilized world, will be found uniting in ceremonious observ appea of the day, in testimony of their reverence for his talents, and the excellence of the lossons im parted in his works.

THE NEW STATE ARSENAL, COR. SOTH ST., AND SEVENTH AVE.—To the Editor of the Sua:—In the notice of the opening of the above building, in your impression of Wednesday last, it is stated to be the invention of the authorities to appropriate the upper flor ras a "multary drill room." Allow me to sek the said authorities (through your valuable medium, if it would not be prudent for them, (before so doing,) seriously to reflect upon the probable issue of such an act, and whether they are aware that the immense vibration of the floor, and building generally, which would result from the exercise of only a score or two of men, (to say nothing of the number which might, at any period, be "put through their paces" in a space of 188 feet by 86 feet, or nearly 1800 square fiet.) which would, alone be sufficient to endanger the stability of any compitont and wall-seasced building, and therefore a most impalite liberty to take with a structure so recently erected, and which has not yet had time to settle and consoli-THE NEW STATE ARSENAL, COR. SOTH ST.,

date itself; beside which, such an act would be a great injustice to the architect, who would drubtless be subject to public censure if any harm should be the result.

It is a well known professional axiom, that the stability of buildings, (especially floors, suspension bidges, and similar structures,) is more severely tested by shear eitherstone, than by any superincumbent weight imposed upon them; consequently 'military exercises' are befitting only the ground surface to which they should be restricted.) and if I were the architect of the new State Arsenal, I would immediately and firmly "protest" against the application of an upper floor thereof for any such purpose. You likewise, Sir, report that each of the eleven principal trusses of the roof is capable of sustaining 300 tons weight. Surely this must be an error, as a roof only 86 feet span could not require such massive construction as to possess such an amount of strength—the desideratum in a roof, being "the strong the to support itself and every weight (and atmospheric pressure) to which it might be subjected, and not to impose an unnecessary burden upon the sealls, but, by judicious construction, to TIS them together, and to protect the whole building from the inclemency of the weather.

Trusting this important matter may be reconsidered, and that we shall not hear of the fall of another roof the "State Arsenal," nor have to deplore the loss of many lives, both within and without the said building, is the sincere wish of Your constant reader.

#### JERSEY CITY.

THE SCOTING AFFRAY.—THOMAS SMTTH, she shot Thomas Lennon on Monday night, at Dotle's Corner, in Mongomery street, Jorsey City, riginating in a fight growing out of political discussion, was posterday committed to the caunty jell by Recorder Bedvord, who refused to admit him to

by Recorder Benvord, who refused to admit him to bell.

The prisoner Smith states that in passing Dorm's, on Monday evening, he beard loud ta'king, and wend in there, when he saw Walz. Lams throw down a roll of bills on the cunter, and offering to bet; he (Smith) picked up the money and told Lams not to bet, and then sat down; that Lamson came up and said, "Now, d.—nyou, I have got you, and will give it to you;" at the same time striking him several blows, while others also hit him. Belleving that the attack was premeditated, Smith drew a revolver and fired twice, one bell taking effect in Lamson's stomach and lodging against the left hip bone, from which it was extracted by Dr. Quidon; and the second one passing through Patrick Kinkurshan's cost skirk.

The injured man states, that he had a souffic with Sanvin, but had no intention of fighting.

Lamson is not in immediate danger, but it is feared that inflammation will set in and terminate fataly.
